

Milan Metro

Offering unparalleled connectivity through Milan’s only carrier-neutral retail data centers

Milan is the financial capital of Italy and one of the world’s economic powerhouses. The city and the surrounding areas have one of the largest densities of multinational companies in Europe and are home to more than 40 foreign banks. Italy benefits from one of the Eurozone’s highest levels of mobile connectivity, enterprise cloud adoption and data usage. Milan is home to the Borsa Italiana—the main Italian stock exchange. This makes the Lombardy region one of Europe’s strongest markets, with the second-highest regional GDP in continental Europe.

Our Milan International Business Exchange™ (IBX®) data centers are business hubs for 160+ companies, and Equinix is both the metro’s only carrier-neutral retail colocation provider and the only global provider in the metro. Located in prime strategic locations, our centers offer direct fiber connections to major telecommunications carriers via Milan’s principle interconnection hubs. Customers can choose from a broad range of network services delivered by 25+ local and international network service providers and 75+ cloud service providers.

Milan metro facilities

The Milan IBX data centers consist of four buildings with a combined 66,000+ square feet (6,200+ square meters) of scalable colocation space featuring fully redundant power supplies to ensure operational resiliency and world-class security. All three are in close proximity to the city’s established business districts.

The value of interconnection

- Interconnect with 160+ of the world's leading organizations located in Milan IBX data centers
 - Enable on-demand and direct access to cloud, network, storage, compute and application service providers via Equinix Fabric™
 - Optimize communications and exchange data with enterprises, content providers, and cloud, network and internet service providers
 - Leverage Performance Hub* to enable next-generation wide area network (WAN) architecture for secure and highly reliable connectivity to 25+ network service providers and 75+ cloud and IT service providers
 - Exchange peering traffic through Equinix Internet Exchange™ (EIX), the largest global peering solution across 60+ markets
 - Access the Milan Internet Exchange (MIX), TOP-IX and other interconnection services at Via Caldera
 - Provide cloud and internet services quickly and easily to Equinix-deployed customers
- Maximize the use of digital channels with access to the main media hubs in Milan and throughout southern Europe
 - Interconnect with top content and digital media (CDM) companies to reduce latency and help improve user experience
 - Connect directly to some of the world's largest financial service organizations, achieving the lowest latency connection in proximity to one of Europe's largest financial markets
 - Meet compliance requirements, now and in the future. Each Milan IBX data center is highly accredited, including certifications for ISO 27001 (security management), PCI DSS 3.2 (card payments specific accreditation), ISO 14001, ISO 50001, ISO 9001 and OHSAS 18001

Connectivity options through Equinix
