

# NETWORK ECOSYSTEM EQUINIX BRAZIL

In an interconnected world, boundaries cannot stop your business

Connectivity is very important to any IT environment. Equinix is proud to be the most connected and with the best quality bandwidth carrier neutral data center in Brazil. We have redundant connections with the leading networks and the IX.br in RJ and SP.

Our data centers in Brazil are connected by redundant fiber rings, and between SP1 and SP2 units we have a dark fiber ring 100% redundant with double approach that is lit by four independent DWDM systems and can reach up to an impressive 1.6 Tb/sec.

# DATA SHEET
